

## PERSONAL BACKGROUND

Hi there! I'm an enthusiastic front-end developer with a keen sense of style who is committed to creating user-friendly, responsive websites. Using HTML, CSS, and JavaScript, I specialize in turning concepts into interactive experiences that optimize speed and provide a smooth user experience on all platforms.

## SKILLS

I have experience collaborating with designers and backend developers to turn UI/UX concepts into fully functional web applications. I have hands-on experience with version control systems I, and I'm comfortable working in distributed teams using Agile methodology. With a strong foundation in front-end development, I pay attention to responsive design, performance optimization, and clean, maintainable code.

Software and technologies I'm familiar with:

- HTML5, CSS3, JavaScript (ES6+), TypeScript
- React.js, Next.js, Tailwind CSS
- Git, GitLab
- Figma
- VS Code, Chrome DevTools
- RESTful APIs, JSON
- Agile/Scrum workflow

## EDUCATION

Hanoi University

Bachelor of Information Technology

## WORK EXPERIMENTS

### CROSSIAN LLC | 1/8/2022 - 30/6/2023 | INTERNSHIP

- Collaborate with UI/UX designers to build a pixel-perfect Storefront
- Build functionalities for CMS Publisher and CMS Admin
- Use Selenium and BrowserStack for automation testing

### CROSSIAN LLC | 1/7/2023 - 31/5/2025 | FRONTEND DEVELOPER

Project: E-commerce Storefront

Tech stack: NextJs, NodeJs

- Collaborated closely with UI/UX designers to implement a pixel-perfect, fully responsive Storefront for an e-commerce platform serving millions of users across multiple domains.
- Integrated both Client-Side Rendering (CSR) and Server-Side Rendering (SSR) to optimize load speed and SEO
- Integrated with multiple third-party payment providers, including Stripe, PayPal, Apple Pay, and Amazon Pay, providing a seamless and secure checkout experience across devices.
- Worked in a cross-functional team under Agile workflow, collaborating with backend and QA to ship production-ready features via GitLab CI/CD pipelines.

Project: In-house Content Management System

Tech stack: ReactJs, Redux, REST API

- Developed core features for an internal dashboard to manage critical business data, including ad performance tracking and inventory management.
- Focused on building clean, maintainable codebases by designing and implementing reusable components, reducing UI redundancy across modules.
- Collaborated with team members to define scalable architecture for data-driven views, handling edge cases, and loading states with care.
- Worked in Agile sprints, regularly syncing with the product team to clarify requirements and deliver stable, testable features.

## HIGHLIGHTED PROJECTS

### User-Interactive Blog

Link to Github: <https://github.com/MinHieu2811/blog>

Techstack: NextJs, Shadcn/ui, MDX, Framer Motion

- Built a dynamic blog platform that emphasizes user interaction and engagement, allowing readers to react to content, leave comments, and explore expandable, animated sections.
- Developed a lightweight Markdown-based content system with custom renderers, supporting rich formatting and embedded media (images, videos, code snippets).
- Implemented interactive components such as like buttons, collapsible sections, scroll-based animations, and smooth navigation using Framer Motion.
